Von Emmett Dulaney : MCSE TestPrep: TCP/IP (MCP-Imprint New Riders) before purchasing it in order to gage whether or not it would be worth my time, and all praised MCSE TestPrep: TCP/IP (MCP-Imprint New Riders):

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Lots of exam questions, but how many of them are useful?Von Ein KundeThe theory behind a lot of the practice exam questions are absent from the book. The 'claimed' layout of the exam is incorrect. The questions on addressing are based on old RFC's and most of the questions are quite different to the ones I sat for in the real exam (but maybe thats just my luck). Maybe the exam format has changed since the introduction of the book? who knows! Well as for me, I get to look forward to purchasing another book and sitting the exam again:(0 von 0 Kunden fanden die folgende Rezension hilfreich. great bookVon minimoonsome errors in the question, but overall, it was very good. tcp/ip is complex suite of protocols and if you can solve 90% of problems in this book, i am sure, u will pass the exam

KurzbeschreibungThe MCSE TestPrep series is a unique way to prepare for MCSE exams. Each of the chapters covers a different exam objective. Each objective is further broken down into manageable sections. The information will be presented in a brief, outline format with supporting tables, figures, screen shots, and lists. Following each section will be a series of review questions, exercises, and answer explanations. Two complete practice exams and a glossary will be located at the end of the book.
